

CA28

Tin catalyst (for use with ACC Silicones 2 Part encapsulants)

Introduction

This curing agent is formulated for use primarily with Silcoset 2-Part RTV silicone rubbers. It can also find uses with other 2-Part Condensation cure rubbers. CAA 28 is normally supplied as the standard catalyst in the appropriate quantity with each delivery of Silcoset 2-part RTV rubber compound, unless an alternative is specified.

Key Features

- For use with Silcoset 101, 105, SE2005 and SE2018

Use and Cure Information

Full details for use of this product are given in the literature for each type of ACC 'Silcoset' 2-part RTV Rubber.

Health and Safety

Safety Data Sheets available on request.

Packaging

ACC Additives are available in a variety of packaging and sizes. Please contact our sales department for more information.
